H.P. Pushes Forward in Project

From: The New York Times | Sub Discuss 2 comments

While I am thankful anything on NonStop, to play in many business lines so often repeated by journalists poorly qualified to comment - even those at the New York Times. Comment posted 21 hours ago by Richard Buckle

## Who are Infrasoftware?

# Infrasoftware; from the team that brought you ICE, and WebGate!

More than two decades of commitment to providing protocol stacks on NonStop in support of SNA as well as SNA services over IP!

Were the first to embrace internet services in support of XML and SOAP and integrate into existing ICE product offerings!

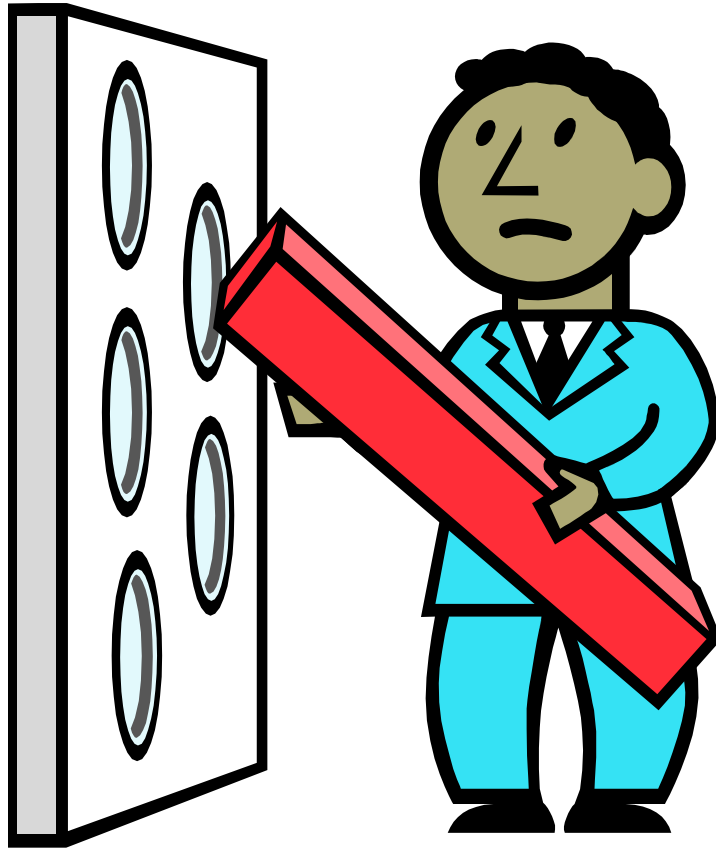

**Insession  
Technologies**

- SNA hardware obsolete? IBM and Cisco no longer supporting?
- SNA personal retired? Dearth of staff hindering growth?

uLinga exploits today's modern networking components and controllers and doesn't rely on any former SNA components. Only the latest TCP/IP controllers and drivers are required!

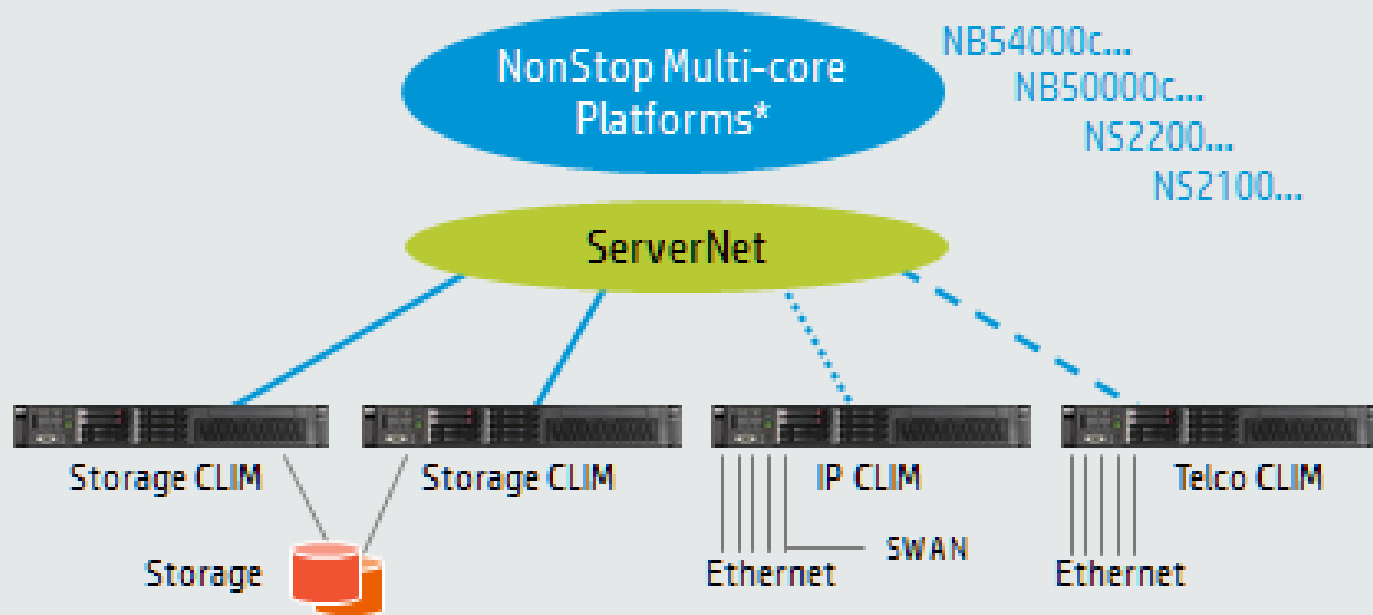

In providing new solutions and offering products to replace those no longer considered strategic, incompatibility is not an option!

## Moving to Blades with Network CLIMs requires A pure IP environment ...

### NonStop CLIM I/O infrastructure

\*Also connects to select NonStop single-core platforms (e.g. NS16200)

(40,000 people)

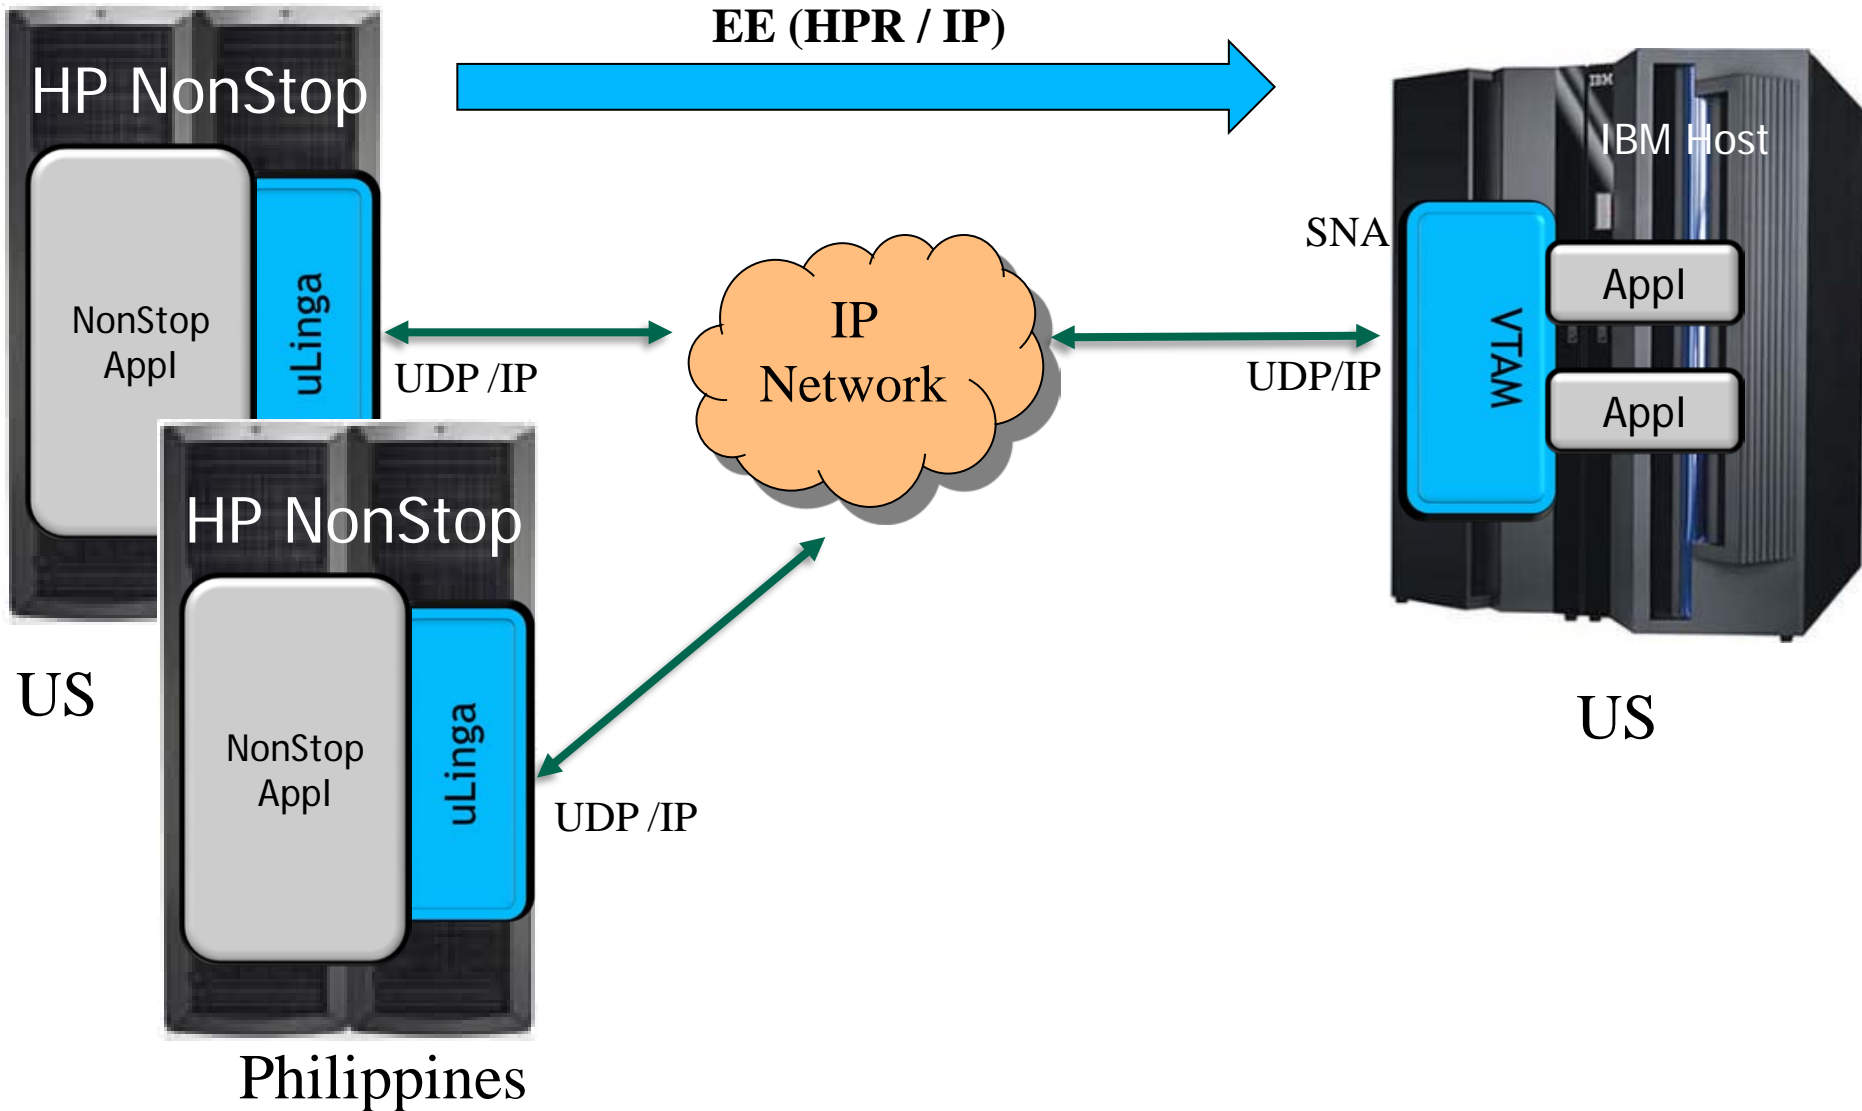

**“With uLinga for EE, we were able to deploy a solution that offered all the functionality of our prior platform – but at a much more competitive price point ...**

**In deploying, we didn’t have to make any changes to the host, which was vital in ensuring we always met our performance and availability targets.”**

Peter Segeth
