## **Mimer Information Technology**

### **Title**

Mimer SQL for OpenVMS on x86, features and futures

### **Abstract**

Mimer SQL was the first relational database to be released on OpenVMS x86. A beta was available to the public in July, 2021, and first production version released in March 2023.

The presentation is about this proven RDBMS and its capabilities, as well as experiences from the porting from Itanium to OpenVMS for x86. It will also cover some of the new and exciting features that will come in the upcoming version.
