Title

NonStop 2Q2024 Roadmap Update

Abstract

Get a briefing on the status of new solutions and products currently under development within the NonStop eco-system. This will cover the latest in customer solutions for Digital Resilience, Fraud Prevention, and NonStop-as-a-Service. You will get insights into some key technology enablers for developers to ease their modernization projects and development environments as well as the plans to augment the data at rest security. There will also be an update on the next generation of integrated solutions, public cloud, and GreenLake.

Speaker

Ian Inglis, NonStop Product Management
