Title

PCI and AI: how to implement PCI compliant Tokenisation on HPE NonStop and take advantage of AI platforms.

Abstract

The presentation will provide the opportunity to discuss the challenges of PCI 4.0 in the HPE NonStop environment. In addition, we will demonstrate how the tokenisation of data can be used with AI techniques to protect data to provide superior results.

Speaker

David Lock, Senior Sales Solutions Architect

Speaker Biography

David Lock has been working in the payments industry in a variety of positions for over 40 years throughout the world.
