# Abstract Presentation
## 10 April 2024 – 09.15 h

## ETI-NET

**HPE Data Backup & Management Solutions: Delivering Digital Resilience to Protect and Modernize HPE NonStop through ETI-NET's suite of products.**

### Abstract

Protecting NonStop systems from the growing threats imposed by bad actors has become a top priority of organizations globally. Learn about the latest threats, XYPRO partnership, and ETI-NET's innovative product enhancements that help NonStop customers maximize digital resilience and address modernization requirements like secure cloud, role-based security, and cross platform monitoring. We will review recent European customer use cases of ETI-NET products that improve security and deliver modernization to NonStop administration and operations.

### Speaker

Mike Mitsch, Director
Storage and Management Tools

### Speaker Biography

Mike Mitsch is ETI-NET's Global Business Development Director overseeing Storage & Management software at ETI-NET. With over 35 years of IT/Service experience, he has launched the first Intel based AL4 class (lockstep) Fault Tolerant computing systems, high-performance backup storage, and most recently highly secure FedRAMP cloud services.
