### **ETI-NET**

**HPE MultiBatch Solutions: Modernizing and Protecting the NetBatch environment through a standardize migration template for HPE NonStop.**

#### **Abstract**

Modernizing and protecting NonStop system operation has become a top priority of organizations globally. Learn how HPE NonStop batch processing can be protected and modernized through ETI-NET's latest MultiBatch enhancements and migration service available through HPE's SDI program and templates. Designed to help NonStop customers maximize digital resilience and address modernization requirements, this session will review the MultiBatch NonStop SDI template that provide NonStop batch migration services including schedule analysis, performance tuning, optimization, and migration. Recent European customer examples of will be covered in the session.

#### **Speaker**
