NonIT Keynote

Title

A common sense approach to digitization

Abstract

Will Big Data and Artificial Intelligence really revolutionize the way we work? Vince suggests that we take a step back and relax a bit. In this keynote, speaker Vince Ebert debunks popular myths regarding our future and clarifies the role of technologies such as AI in our lives.

Through surprising and funny examples, Vince will show that humans will always be better than any computer – even in the future. Furthermore, he will also teach you how to use your imagination and creativity to be successful in the future.

Vince designed the talk »BIG DADAISM« to encourage his audience to use common sense instead of blindly the digital hysteria which surrounds us these days

Speaker

Vince Ebert, Kabarettist
