**Hewlett Packard Enterprise**

**Title**

AI/ML models development & training tools by Hewlett Packard Enterprise

**Abstract**

This talk will center on the hardware and software infrastructure that HPE provides to assist organizations in developing and training AI/ML models. The basic premise is to educate the target audience about HPE's top commercial and open-source solutions for AI at scale projects.

Target audience:

Business and technical leaders who are in search of the most effective and efficient solution for AI/ML projects

**Speaker**

Volodymyr Saviak  
Hewlett-Packard Enterprise AI at Scale & HPC Sales Manager

**Speaker Biography**

Volodymyr Saviak  
For more than 25 years, delivers IT infrastructure solutions on the Central Eastern European market, focusing on High Performance Computing, Big Data, Storage and recently Artificial Intelligence at Scale. Volodymyr is helping organizations understand how to build and implement cutting-edge technical computing solutions focused on highest performance and scalability. For the development of the "First Ukrainian Supercomputer Center" and the Ukrainian HPC community, he was awarded Ukraine's Parliament Highest Honor Award.
