Forward-looking statements

This is a rolling (up to three year) Roadmap and is subject to change without notice.

This document contains forward looking statements regarding future operations, product development, product capabilities and availability dates. This information is subject to substantial uncertainties and is subject to change at any time without prior notification. Statements contained in this document concerning these matters only reflect Hewlett Packard Enterprise's predictions and / or expectations as of the date of this document and actual results and future plans of Hewlett Packard Enterprise may differ significantly as a result of, among other things, changes in product strategy resulting from technological, internal corporate, market and other changes. This is not a commitment to deliver any material, code or functionality and should not be relied upon in making purchasing decisions.

HPE confidential information

This is a rolling (up to three year) roadmap and is subject to change without notice.

This Roadmap contains HPE Confidential Information.

If you have a valid Confidential Disclosure Agreement with HPE, disclosure of the Roadmap is subject to that CDA. If not, it is subject to the following terms: for a period of 3 years after the date of disclosure, you may use the Roadmap solely for the purpose of evaluating purchase decisions from HPE and use a reasonable standard of care to prevent disclosures. You will not disclose the contents of the Roadmap to any third party unless it becomes publically known, rightfully received by you from a third party without duty of confidentiality, or disclosed with HPE's prior written approval.

Coming soon (maybe!):

- **More Measure Entities**
- **Pathway – Interface & Alerts**
- **Shadowbase**
- **Application logs & Stats!**
- **Over 32 additional enhancements**

Web ViewPoint Enterprise - Benefits

- Immediate productivity gain
- Comprehensive analyses & analytics
- Offers features that matter
- Light footprint
- Browser based (no client installation)
- Easy to learn and use
- Automated management solutions
- Integrated AI
- Live to Cloud connectivity
- Reasonably priced
- Long track record
- Serves current, and next generation

Next

- Deep Artificial Intelligence
- Loopback from Performance to Operation
- Self management
- Self healing
