28 April 2015, 16.30-17.15

CSP - Computer Security Products Inc.

CSP Security.com - SOLUTIONS FOR HP NONSTOP SERVERS

Speaker

Callum Barclay

Title

OSS Security - What you need to know

Abstract

OSS Security is an often misunderstood topic as many customers are tasked with using unfamiliar tools and processes to secure OSS application environments.   Unlike NonStop Guardian, files and directories are not secured using Safeguard directly. CSP would like to review the issues with you, present a methodology to maintain a secure OSS environment and introduce you to some of the tools that can be used to simplify and automate the process.
