

Title

Database Compare, Load and Migration solutions

Abstract

Check out the latest from TANDSoft - FS solutions Backup, Validate, Load and Repair all NonStop Databases in real-time and use Block technology for unmatched Blazing fast speeds. The next generation E-2-S 4.0 enables Enscribe to SQL migration and is the most cost-efficient and secure solution for your applications. Taking advantage of our experience as interception specialists, E-2-S permits easy conversion of Enscribe calls to SQL/MP and SQL/MX statements.

Speaker

Jack Di Giacomo
CEO, TANDsoft

Bio

Jack Di Giacomo has over 30 years of experience in designing, developing, and supporting HPE NonStop software solutions. His early experience included the software architecture of replication-oriented products. As a developer in the formative years of Tandem, Jack recognized the need for additional tools that were unavailable to software professionals. In 1993, Jack started TANDsoft Inc. to offer such products. TANDsoft specializes in interception technology and database modernization. The company's most recent solution is the seamless interception of Enscribe calls for conversion to SQL/MP and SQL/MX statements.
